

DIESEL EXHAUST FLUID (DEF)

DESCRIPTION:

H2 CHARGE – JUGS. H2 Charge Diesel Exhaust Fluid (DEF) is a non-toxic, stable and a colorless solution. It's for use as a consumable in vehicles through Selective Catalytic Reduction (SCR) technology to meet EPA emissions standards for diesel engines. H2Charge lowers NOx gases in diesel exhaust emissions. H2Charge is a highly pure solution that ensures the vehicle is performing at maximum efficiency. H2Charge DEF helps avoid damage and/or clogging in the catalytic converter and prevent loss of warranty coverage provided by the manufacturer. H2Charge DEF aids in achieving maximum vehicle performance. H2Charge DEF aids in achieving maximum vehicle efficiency. H2Charge's purity and composition ensures your vehicle meets North American emissions standards

Size:	9.46 Liter jug
Size:	205 Liter drum
Size:	1000 Liter Tote
