		12	G783-500MB12	77
Complete with Heavy Duty Flange x Grooved ends				
2"	2"	25	G783-200HV25	38
		50	G783-200HV50	67

G783 Assembly

All Green Line Concrete Placement hose assemblies are factory made with Heavy Duty Flange ends designed specifically for our hose. Assemblies are available with fittings at both ends or at one end only. To connect 4" hoses to 3½" hoses, we offer a tapered bore fitting to reduce turbulence. In the 2" size, assemblies are also available with Grooved End fittings at one end for Shotcrete nozzle applications. For additional sizes, lengths, and configurations, please contact us directly.
