

LANCING ROD W/PUSH END

Description:

Lance pipes are hollow and designed to produce extreme and concentrated heat when connected to a source of oxygen and ignited. Burning at heats exceeding 3000 degrees C, they're used to cut a variety of tough materials, and are leveraged by our partners in the steel and smelting industries.

Material:	Steel
Diameter:	.540" OD (13.716mm)
Length:	10ft, 6 inches
Product Number:	LR214
