

LUBRIPLATE 105 ASM

Description:

Lubriplate is a calcium complex motor assembly grease, which prevents “dry start”, scuffing, scoring, and friction. Protects freshly machined engine parts. Zinc-oxide anti-wear additive. Lubriplate No. 105 is an excellent lubricant for coating engine parts when assembling either a new or rebuilt engine. They are excellent rust preventive greases.

Size:	10 Oz
Container Type:	Tube
Operating Temp Range:	-25 F to 140 F
Brand:	Lubriplate No. 105 ASM
