

1/2” NPT x 3/8” HOSE STEEL NIPPLE

Description:

The constant vibration created by air tools, like air drills and pavement breakers, is destructive to air hose couplings, especially the quick-acting type. To provide protection against coupling breakage and related hazards, Dixon recommends the use of a whip hose.

- To construct a whip hose, connect one end of a short (3' to 10') air hose to the air tool using a 3500 type steel nipple. Connect the other end of the hose to the air supply using the standard quick-acting coupling. The heat treated 3500 nipple will withstand vibration far better than the standard coupling and provide a safer connection. The whip hose should remain permanently connected to the tool.

Weight:	.1945lb
Material:	Zinc Plated Steel
Male Thread:	NPT
Hose Size:	3/8”
Male Thread Size:	1/2”
Pressure Rating:	600 PSI at 70°F (21°C)
