

## **PRESSURE WASHER STRAINER ASSEMBLY**

### **Description:**

Suitable for a wide range of applications, this water filter is ideal for pressure washers, garden hoses, and whole house water filtration systems. It effectively filters out sediment and debris to provide you with clean and clear water. With this water filter, you can prevent sediment and debris from entering your garden hose or pressure washer. Say goodbye to blockages and damages caused by sand and debris. Whether you are connecting it to your pressure washer inlet, a standard garden hose, or a home water spigot, this water filter can easily be attached for effective filtration.
