MANSOUR GROUP

Crush proof, heavy duty suction hose,
c/w a built on tapered strainer on one end.

Used in mining applications or any other industry where you need a crush proof water suction hose with a built on tapered strainer on one end in order to prevent aspiration of rocks or any other debris. Our strainer, as an integral part of the hose, won't be damaged during use as a common steel strainer. The other end of the hose is supplied with a clamped-on Victaulic combination nipple.
