

NEOCORK

Description:

This rubberized cork tape with adhesive is a durable and long-lasting material for gaskets, washers, insoles, pads, insulation, and applications that require medium pressure seals. Cork and rubber is known to stand up to vibration, shock, and intense pressure while resisting heat, gas, oil, and water. This makes it excellent material for industrial applications.

Tensile Strength:	260 psi
Hardness	65 Durometer
Thickness:	1/8"
Width:	1"
Length:	20 Ft
Material:	Rubber and cork
Compressibility:	400 psi, 35-50%
Additional:	Adhesive on one side
