

CURRENT ISSUE

DESCRIPTION:

Current Issue is only for use in parts washing applications. In a parts washer, remove all the loose dirt and grime, spray the parts and then agitate by brushing. Then wipe or blow dry. For soak tank cleaning, simply immerse the parts to be cleaned, allow them to soak, then remove and wipe or blow dry. Current Issue® has a high dielectric strength of over 29,500 volts, a flashpoint above 140 degrees Fahrenheit and non-corrosive, non-caustic properties, making it an ideal cleaner and degreaser. Simply spray and allow the grease, grime and dirt to run off.

Appearance:	Clear liquid
Odour:	Citrus
Flashpoint:	140 F
Container Size:	1 US Gallon
