

## KROWN RUST PROTECTION

### DESCRIPTION:

Formerly T40, Krown Rust Protection & Lubricant is Canada's #1 Rust Protection in a can. To protect metal from rust, a barrier must be created and maintained between the metal and the surrounding elements, especially moisture. This product is designed to create a barrier that can't be broken, chipped or cracked. By staying fluid, our petroleum-based rust protection heals back over after any abrasions providing lasting protection, even in extreme conditions.
