

ALEMITE HYDRAULIC NARROW COUPLER

DESCRIPTION:

The Alemite narrow hydraulic coupler designed for quick, positive, and leak-proof connections with hydraulic fittings. It's commonly used with grease guns to transfer lubricants into fittings, especially in tight spaces. The coupler features a 1/8" NPTF female thread and a rubber seal to prevent leaks. 10,000 PSI Max. Operating Pressure. Primarily used in heavy-duty industrial applications and automotive settings where quick and reliable connection/disconnection of hydraulic lines is needed.

SKU	Part No:	Thread	Type	Pressure	Features
L-12.3.030	308730	1/8" NPTF (f)	Narrow	10,000 psi	Rubber Seal
L-12.3.031	308730-A	1/8" NPTF (f)	Narrow	10,000 psi	With Check valve
