

ACTIVATED CARBON PELLETS

DESCRIPTION:

Anthracite coal based activated carbon Pellet 40/70 for air filter media replacement. Activated carbon pellets are used in air purifiers to remove odors, volatile organic compounds (VOCs), and other pollutants from indoor air. Activated carbon is crucial in industrial settings to remove pollutants from exhaust streams and ensure compliance with environmental regulations. Activated carbon is also used in paint booths to control odors and remove VOCs from the air. In addition to air purification, it is also used in mining in the recovery of precious metals from ore.

CTC:	70%
Diameter:	4.0 mm
Moisture as packaged:	< 5%
Material:	Carbon media
Density:	0.42 – 0.48 g/cc
Hardness:	>98%
Size:	P-40/70 0.5kg/bag
