

WHITE SUPER POLISH PADS 18”

DESCRIPTION:

The 18” White Polish Floor Pads are professional-grade floor pads designed for polishing and maintaining various floor surfaces. With a diameter of 18 inches, these pads are suitable for use with standard-sized floor-cleaning machines and buffers. The white polishing composition of these pads is designed to bring out the natural shine of floors. They effectively remove light scuff marks, scratches, and dullness, leaving a glossy finish. With a diameter of 18 inches, these pads are compatible with floor cleaning machines and buffers that accommodate this size. The larger pad size provides excellent coverage, making polishing more efficient for larger floor areas. The product is sold in a package of 5 pads per case (5/cs), offering convenience for purchasing multiple pads and ensuring an adequate supply for polishing tasks.

Directions:

- **Preparing the Area:** Clear the floor of any loose debris, dust, or large particles before using the floor cleaning machine for polishing. This helps prevent clogging of the pads and ensures effective polishing.
- **Equipment Setup:** Attach the 18" polishing pads securely to a compatible floor cleaning machine or buffer following the manufacturer's instructions.
- **Polishing Process:** Apply a small amount of polishing compound or polish to the floor surface, following the manufacturer's recommended guidelines. Spread the polish evenly over the desired area.
- **Starting the Machine:** Turn on the floor cleaning machine or buffer and slowly move it across the floor surface in a systematic and overlapping manner. Apply even pressure to allow the pads to effectively polish the floor.
- **Polishing Technique:** For best results, move the machine in straight lines, working from one end of the room to the other. Overlap each pass slightly to ensure even polishing coverage. Pay extra attention to high-traffic areas and spots that require more intensive polishing.
- **Rinse and Clean:** After completing the polishing process, remove any excess polish from the floor using a clean, damp mop or cloth. Allow the polish to dry completely before walking on the floor.
- **Pad Maintenance:** Rinse the polishing pads thoroughly after use to remove any residue or polish. Allow them to air dry before storing them in a clean and dry area to prevent contamination and maintain their effectiveness for future use.
