

Butterfly Valves

Application:	Butterfly valves are commonly used on dry bulk tankers to control the flow of product; designed to be placed between 2 ASME/ANSI 125 or 150 lb. flanges.
Materials:	Aluminum bodies with iron or stainless-steel disc, polymer bushings, Buna-N (Nitrile) seals and seats, spring, stem and locking lever pin are stainless-steel, aluminum handle and throttling plate.
Features & Benefits:	• Rugged cast aluminum • Flange gaskets are not required; the valves elastomer seat also doubles as the flange gasket. • Handles are high strength 713 aluminum, with a retrogressive re-aging process which creates as stronger handle than the cast iron handle which are commonly used in the industry • Iron or stainless discs are standard for superior wear resistance • FDA approved black or white Buna-N seals, -20°F to 275°F (-29°C to 135°C)
