

STEEL GATE VALVE 4" FLANGE X MNPT

Description:

The Betts gate valve is an economical manually operated external stop valve that offers a double action hand wheel for efficient closure. The standard 316 stainless discs offer premium corrosion resistance and the adjustable packing nut with woven PTFE infused packing allows for easy stem adjustments. The metal-to-metal seal has advantages for many applications but is susceptible to wear and scratches.

Body Material:	Steel
Size:	4"
