

QUICK OPENING GATE VALVE, SIDE LEVER

Description:

Quick open gate valves with side levers are used in industries that require fast, manual control over the flow of high-volume fluids. The quick-action lever allows for rapid opening and closing, making it ideal for discharge applications and other processes where minimal flow restriction is needed. Often used on tanker trucks these valves are ideally suited for cost effective isolation of a variety of fluids.

Part No:	Size	Material:	Thread Type
F-3.11.074	3"	Brass	F x F
F-3.11.146	4"	Brass	F x F
