

## 1/2" HANNAY HOSE REEL SWIVEL JOINT

### Description:

The Hannay Hose Reel high-pressure, 1/2-inch, 90-degree steel swivel joint is designed for use with hose reels, ensuring seamless fluid flow while handling fluids like compressed air, water, oil, and hydraulic fluid. It is built to withstand up to 5,000 PSI, features chemical-resistant Aflas seals, and includes a Zerk fitting for lubrication to extend its lifespan. The Hannay Reels swivel joints are designed for fluid transfer in demanding environments, compatible with a wide range of fluids including hydraulic fluid, air, and oil in heavy industrial, automotive service, construction, agriculture, and fire and rescue applications.

<b>Material:</b>	Steel
<b>Size:</b>	1/2"
<b>Thread Type:</b>	Female x Female NPT
<b>Maximum Pressure:</b>	5000 psi
