

3/8" FEMALE NPT HYDRAULIC BALL VALVE

Description:

This hydraulic ball valve acts as a shut-off valve to completely open or close hydraulic flow. Features zinc-plated carbon steel construction and POM polyoxymethylene (Delrin®) seals. Complete with mounting holes, they can be used in a wide variety of applications including general hydraulic systems and tools, test equipment, and agriculture and mobile equipment.

***Note:** Straight-through hydraulic ball valves should be fully open or closed and are not recommended for flow control. These valves are not designed for use with water.*

Material:	Zinc plated carbon steel
Pipe Size:	3/8"
Thread Dimensions:	3/8-18
Thread Type:	Female NPT
Maximum Flow Rate:	30 L / min
Working Pressure:	7250 psi
