

1/16" CLOSED CELL NEOPRENE WITH ADHESIVE

Description:

Closed-cell 1/16" neoprene with adhesive backing is a thin, flexible foam material that's waterproof and durable, featuring tiny, sealed air pockets (closed-cell) for insulation/cushioning, and a pressure-sensitive sticky side for easy application as a gasket, seal, or padding in DIY projects, automotive, marine, and general weatherstripping. It resists water, oils, and temperature extremes, making it great for gaskets, sealing, insulation, soundproofing, and dampening vibrations.

|------------------------------------|-----------------------------|
| Thickness: | 1/16" |
| Temperature Range: | -40 F to 200 F |
| Colour: | Black |
| Density: | 160 – 224 kg/m ³ |
| Shore Hardness | 65-75 Durometer |
| Tensile Strength: | 150 psi |
| Water absorption by weight: | 5% Max |
