

DURASHIELD WITH BONDING LAYER

Description:

Durashield with bonding layer offers outstanding wear, tear, corrosion, and abrasion resistance. It reduces noise and impact for a better and safer work environment. Longer life, and less down time. The unique bonding layer will ease installation by improving adhesion to metal and other surfaces. Protection effectively defending surfaces to increase service life of vital equipment. DuraShield is typically used for; linings, chutes, hoppers, cyclones, pipes, tanks, truck bins/boxes, silos, skirting, pulley lagging, shaker screens, sand blasting curtains, and squeegees.

Width:	48"
Colour:	Red
Hardness:	40 Shore A
Tear Resistance:	350 lbs
Tensile Strength:	3300 psi
DIN Abrasion Resistance:	Wet 40 mm ³ / Dry 160 mm ³
