

BUSH HOG RELIEF VALVE

Description:

A Bush Hog Relief Valve, often referred to as a vacuum relief valve or breaker valve, is a safety component used for specialized valves on vacuum systems to prevent dangerous pressure buildup or vacuum loss. These valves prevent overpressure or collapse by allowing air in or out, typically featuring a check valve or plunger mechanism.

Part No:	Description:	Size:	Material:
F-2.13.002	4" Bush Hog Relief Valve	4"	Steel
F-2.13.051	6" Bush Hog Relief Valve	6"	Steel
