

CLAMP, SWITCH POINT

DESCRIPTION:

The Switch Point Clamp is a heavy-duty railroad safety device manufactured to lock mechanical rail switches securely in position. It is primarily utilized by track repair crews, rip track workers, and maintenance personnel to prevent the accidental opening of railroad switch points during track adjustments or maintenance operations. For use on standard rails of 80 – 140 lbs. Can accommodate a standard padlock (not included)

Material:	Steel
Weight:	9 lbs
