

"Loc-It" ***Directional/Throttle Lock Out***

Technical Data:

Weight: 0.25 lbs.
Dim.: 3" x 3.5" x 1"

- Simple, maintenance free design
- Precision machined
- Heat Treated components

Description:

The Loc-It is an innovative device designed to effectively safeguard mechanical service employees from unintended train movement while they are performing work on locomotives.

This device is inserted into the reverser control. The unique, patented design of the Loc-It offers users simplicity, reliability, functionality, and safety.
