

RODAKA 100 COMPRESSOR OIL

Rodaka 100 Compressor Oil is a premium quality lubricant developed for use in air compressors and select steam turbines operating under severe-service conditions, and in moisture-free environments. It is particularly recommended for use in applications where operating conditions may be unfavorable or too severe for conventional mineral oil-based lubricants.

Rodaka 100 oil is formulated to provide long service life and excellent performance over a wide temperature range. It has excellent oxidation resistance and thermal stability at high temperatures to minimize sludge and varnish formation, and provide long service life. It also has excellent low-temperature properties for use over a wide temperature range. It has good natural detergency to help minimize deposit formation in air compressors and on the bearing surfaces of steam turbines. It protects system components against rust, corrosion, and wear. It has good water-separating properties and is resistant to excessive foam buildup. It has lower volatility than conventional mineral oil-based lubricants for reduced oil consumption.

FEATURES & BENEFITS

- Excellent resistance to thermal breakdown at high temperatures
- Excellent oxidation resistance to minimize sludge and varnish formation
- Protects against wear
- Protects against rust and corrosion
- Natural detergency
- Excellent low-temperature properties
- Extended service intervals compared with conventional mineral oil-based lubricants

SPECS

- Viscosity Grade: ISO VG 100
- Weight Equivalency: SAE 30 non-detergent
- Compressor Type: Reciprocating / piston-type air compressors
- Type: Petroleum-based mineral oil (unless noted as synthetic) with anti-foam and anti-wear additives

**Lubricant for
Air Compressors
& Some Turbines**
